

Pathan Mohammad Kalfan

Device Associate — Manual QA Tester (Black Box Testing)

Bengaluru, India

kalfanpathan@gmail.com | +91 93907 22687

Professional Summary

Detail-oriented Device Associate with hands-on experience in manual testing, black-box validation, test case execution, and defect reporting for production applications. Strong understanding of test execution workflows, regression testing, entry/exit criteria, and quality validation across desktop and web-based platforms. Comfortable working under deadlines, reporting results accurately, and collaborating with cross-functional teams in Agile environments.

Core Skills

Manual Testing: Black Box Testing, Functional Testing, Regression Testing, Repetitive Testing

Test Execution: Test Case Execution, Result Validation, Entry/Exit Criteria, Acceptance Criteria

Defect Management: Bug Identification, Defect Reporting, P1/P2/S1/S2 Validation, Retesting

Platforms: Windows Desktop, Web Applications, Mobile Web

Tools: JIRA, GitHub, Jenkins (CI Awareness), Excel, Word

Methodologies: Agile / Scrum, Daily Status Reporting, SLA Adherence

Experience

Technology Intern – Quality Validation & Backend Support — DMX Technologies Pvt. Ltd., Bengaluru

- Executed manual test cases for multiple production applications to validate new builds and feature updates.
- Performed functional, regression, and repetitive testing to qualify releases without compromising quality.
- Validated entry and exit criteria for builds and ensured acceptance criteria compliance.
- Identified, documented, and reported defects with accurate reproduction steps and severity classification.
- Supported defect retesting and regression cycles after fixes were delivered.
- Maintained daily execution status reports and escalated failures within defined timelines.
- Collaborated with developers and product teams to clarify requirements and resolve execution issues.

Live Application Testing Contributions

Syntheseed.com

- Executed functional test cases for web-based workflows.
- Reported defects and validated fixes during regression cycles.

LearnSquare

- Performed end-to-end testing of learning workflows across builds.
- Verified UI behavior and backend-supported functionality.

Times Code Compiler

- Tested execution workflows and validated expected vs actual results.
- Performed repetitive testing to ensure build stability.

Time4Kids

- Conducted functional and regression testing for content delivery workflows.
- Ensured quality compliance before feature releases.

Additional Knowledge

- Basic understanding of reading scripts/logs for troubleshooting.
- Familiarity with adb command usage for data capture (conceptual exposure).
- Comfortable capturing results, escalating failures, and meeting SLA commitments.

Education

B.Tech — Civil Engineering
